

Job Title: Senior C++ Developer

Location: Bucharest, Romania (Hybrid / Remote options available)

Company Overview:

We are a fast-growing technology company focused on building high-performance, scalable software solutions used by clients worldwide. Our team values clean architecture, efficiency, and continuous improvement. We work on challenging systems where performance and reliability truly matter.

Responsibilities:

- Design, develop, and maintain high-performance applications using C++
- Write clean, efficient, and maintainable code following best practices
- Optimize applications for speed, memory usage, and scalability
- Debug and resolve complex technical issues
- Collaborate with cross-functional teams (backend, QA, DevOps)
- Participate in code reviews and contribute to technical decisions
- Continuously improve system architecture and development processes

Requirements:

- Strong experience (5+ years) with modern C++ (C++17/C++20)
- Solid understanding of OOP, STL, and memory management
- Experience with multithreading and concurrency
- Good knowledge of data structures and algorithms
- Experience working in Linux environments
- Strong debugging and problem-solving skills
- Familiarity with version control systems (Git)

Nice to Have:

- Experience with low-latency or real-time systems
- Knowledge of networking concepts or distributed systems
- Familiarity with Boost or other C++ libraries
- Experience with profiling and performance tuning tools
- Exposure to CI/CD pipelines

Education:

- Bachelor's or Master's degree in Computer Science, Engineering, or a related field (or equivalent practical experience)

Experience:

- Minimum 5 years of professional experience in C++ development
- Proven track record of building and optimizing complex systems

What We Offer:

- Competitive salary and performance-based bonuses
- Flexible work environment (remote/hybrid)
- Opportunity to work on impactful, high-performance systems
- Support for professional growth and continuous learning
- Collaborative and technically strong team environment
- Modern tech stack and engineering-driven culture

Apply now and be part of a team that builds efficient, scalable, and impactful software.
