

Job Title

Senior Java Developer

Location

Bucharest, Romania (Hybrid/Remote options available)

Company Overview

We are a fast-growing technology company focused on building scalable, high-performance enterprise solutions. Our teams work on modern architectures, leveraging cloud technologies and microservices to deliver impactful products across multiple industries.

Responsibilities

- Design, develop, and maintain scalable Java-based applications
- Collaborate with cross-functional teams to define and implement new features
- Write clean, efficient, and well-documented code
- Optimize application performance and ensure high availability
- Participate in code reviews and mentor junior developers
- Contribute to system architecture and technical decision-making
- Ensure best practices in software development and security

Requirements

- Strong experience with Java (8+) and object-oriented programming
- Solid knowledge of Spring Boot and RESTful APIs
- Experience with SQL and relational databases
- Familiarity with Hibernate/JPA
- Understanding of microservices architecture
- Experience with Git version control
- Strong problem-solving and analytical skills

Nice to Have

- Experience with Docker and Kubernetes
- Knowledge of cloud platforms (AWS, Azure, or GCP)
- Experience with CI/CD pipelines
- Familiarity with messaging systems (Kafka, RabbitMQ)

Education

- Bachelor's or Master's degree in Computer Science or a related field

Experience

- Minimum 5+ years of professional experience in Java development

What We Offer

- Competitive salary and benefits package
- Flexible working hours and hybrid/remote work options
- Opportunity to work with modern technologies
- Professional growth and training opportunities
- Collaborative and supportive work environment
