

Job Title: Junior Java Developer

Location: Remote / Bucharest

Company Overview:

We are a growing tech company focused on building scalable backend systems for fintech and e-commerce platforms. We are looking for a motivated Junior Java Developer to join our team.

Responsibilities:

- Develop and maintain backend services using Java
- Work with REST APIs and microservices architecture
- Collaborate with senior developers and participate in code reviews
- Write clean, maintainable, and efficient code
- Debug and fix issues in existing applications
- Participate in Agile/Scrum meetings

Requirements:

- Basic knowledge of Java (OOP, collections, exception handling)
- Familiarity with Spring Boot framework
- Understanding of REST APIs
- Basic knowledge of SQL databases (PostgreSQL or MySQL)
- Familiarity with Git
- Problem-solving mindset
- Good communication skills in English

Nice to have:

- Knowledge of Docker
- Basic understanding of microservices
- Experience with Hibernate/JPA
- Exposure to cloud platforms (AWS is a plus)

Education:

- Bachelor's degree in Computer Science or related field (or equivalent experience)

Experience:

- 0–2 years of experience (internships count)

What we offer:

- Mentorship from senior engineers
- Flexible working hours
- Opportunity to grow into a mid-level role
- Friendly and collaborative environment
